

## NETWORKS AND DISTRIBUTED SYSTEMS LAB

### Networks and Distributed Systems (NetSys) Lab

The Networks and Distributed Systems Lab at OVGU Magdeburg, headed by Prof. Dr. David Hausheer, is active in several networked and distributed systems research areas, including software-defined networking, network functions virtualization, decentralized and overlay networks, as well as related security and economic aspects. At this stage, the group's major focus is c  
economic and secure management of networking resources in fixed and mobile software-defined network infrastructures.
